Service

ND Pharma & Biotech has an established global network of attorneys, agents and experts as well as branding, advertising and licensing professionals, to procure, maintain, protect, enhance and gain value from the IP/PI rights we own and administer.

The company has access to a large patent portfolio, both owned and licensed. These definite-lived patents cover many products, processes and product uses.

These patents protect many aspects of the company's significant research programs and the goods and services it sells. The actual protection afforded by these patents varies from country to country and depends upon the scope of coverage of each individual patent as well as the availability of legal remedies in each country. The estimated value of total portfolio is situated around the 750 M€, at the end of December 2013.

Trade secrets are an important element of the company's intellectual property portfolio of potential future product's marketing.

Many of the processes used to make ND Pharma & Biotech products are kept as trade secrets which, from time to time, may be licensed to third parties. ND Pharma & Biotech vigilantly protects all of its intellectual property including its trade secrets. When the Company discovers that its trade secrets have been unlawfully taken, it reports the matter to governmental authorities for investigation and potential criminal action, as appropriate. In addition, the company takes measures to mitigate any potential impact, which may include civil actions seeking redress, restitution and/ or damages based on loss to the company and/or unjust enrichment.

Ownership of and access to intellectual property rights, particularly those relating to biotechnology and innovations in food, nutrition, ingredient's health, etc., will continue to be important to ND Pharma & Biotech and its competitors.
